

Dear Hiring Manager

interested in working as a Full Stack Engineer at TD Bank. As I'm highly proficient in both front and back-end development. TD Bank is something in which I use on the daily, and know quite a bit about. I'd like to be able to be a part of it to offer my technical and practical knowledge which will allow me to significantly contribute to the productivity and quality of your company's Full Stack Engineer division.

As a current student at George Brown College, I've gained excellent hands-on experience with Data Structures & Algorithms
