SUMMARY / STATEMENT

I'm Evan. A software engineering student soon to graduate in Q2 of 2024, who's currently looking for opportunities to gain experience in my field.

EDUCATION

- Ontario Secondary School Diploma

SKILLS

- Front-end Development (HTML, CSS, Javascript)
- Back-end Development (Java, C#, Python)
- Database Management (MongoDB, Postgres, MySQL, SQLite)
- Knowledgeable in database management
- Experience using cloud services (Microsoft Azure, Amazon AWS)
- Framework experience (Spring Boot, Django)
- Ci/CD experience (Continuous Integration/Continuous Delivery)
- Working on REST API's
- Creating, and maintaining databases.

PROJECTS

Employee management system (College Assignment)

- Worked on handling the front and back end of the project.
- Using REST api's, and deploying the backend to have the frontend make api calls to that deployment.
- Building the front-end to look professional, and modern in its appearance and functionality.

Building an auction site(College Assignment)

- Handled the backend communication in api routing of operations for an auction site.
- Collaborated on designing the front end side of things.
- Learned how to do public deployment of a MVC .net application on Microsoft Azure through Visual Studio.
